

ReadMe 8/12/2006 by Steve Cox

Hallie Ross:

These are 5.1 remixes using a ProTools Mix3 system. The original tracks were recorded on a Studer A80 24 track, later transferred to 3 original 16-bit ADAT's, then digitally transferred from ADAT to ProTools. These are only 2 of several songs which I need to finish. I also don't consider these 2 mixes as completed yet. I will finish all these mixes on a ProTools HD3 Accel system.

These files come from Hallie's "Be There Soon" Album released in the early 90's.

This album was produced by Dave Shogren, one of the founding members of the Doobie Brothers. Dave also played guitar, bass, and keyboards. Tiran Porter, who later replaced Dave on bass, in the Doobie Brothers, also plays guitar on this album.
